NIH DIRECTOR'S **WEDNESDAY AFTERNOON LECTURE SERIES** 2021–2022

3:00 p.m.–4:00 p.m.
Remote-only Lectures via
videocast.nih.gov

FALL 2021

SEPTEMBER 29, 2021
Sherita Hill Golden
Diabetes Health Disparities: Biology, Race, or Racism

OCTOBER 6, 2021
Margaret Pittman Lecture
Linda Fried
Creating Healthy Longevity: A Basis for a Third Demographic Dividend for Society

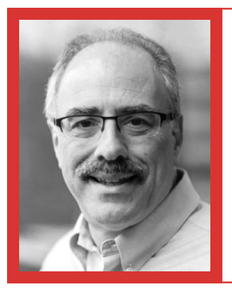
OCTOBER 13, 2021
Kay Tye
Neural Representations of Social Homeostasis

OCTOBER 20, 2021
DeWitt Stetten Jr. Lecture
Trevor Bedford
Evolutionary Dynamics of SARS-CoV-2

OCTOBER 27, 2021
Vikram Patel
Reimagining Mental Health Care in the US: Lessons from Low-resourced Contexts

NOVEMBER 3, 2021
Susan Parkhurst
Wound Repair: Dealing with Life's Little Traumas

NOVEMBER 10, 2021
Kim Janda
A Vision Engaging Pharmacokinetic Strategies to Treat Substance Abuse Disorders and Overdose

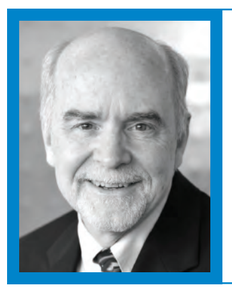


NOVEMBER 17, 2021
Leonard Zon
Blood Stem Cell Clonality and the Niche

WINTER 2021-2022

DECEMBER 1, 2021
Luda Diatchenko
Reconstruction of the Pathophysiology of Chronic Pain from Genome-wide Studies

DECEMBER 8, 2021
Astute Clinician Lecture
Brigitte Widemann
Advancing Therapies for Neurofibromatosis Type 1 (NF1): Lessons Learned from Every Patient



DECEMBER 15, 2021
William E. Paul Lecture
John O'Shea
Cytokine Signaling: The More Things Change, the More They Stay the Same

JANUARY 5, 2022
Danielle Bassett
Title TBD

JANUARY 12, 2022
Andrea Califano
Elucidation and Pharmacological Targeting of Cellular Dependencies at the Single Cell Level

JANUARY 19, 2022
Eric Greene
Single-Molecule Studies of Homologous Recombination

JANUARY 26, 2022
George Khoury Lecture
Julie Overbaugh
Translating Studies of HIV Immunity to SARS-CoV-2

FEBRUARY 2, 2022
Katherine High
Title TBD

FEBRUARY 9, 2022
Doreen Cantrell
Environmental Control of T Lymphocytes

FEBRUARY 16, 2022
Cassandra Extavour
Title TBD

FEBRUARY 23, 2022
Cliff Tabin
Control of Embryonic Morphogenesis

SPRING 2022

MARCH 2, 2022
Margaret Pittman Lecture
Guillermina Lozano
Mutant p53 Activities in Mouse Tumor Models

MARCH 9, 2022
NIH Director's Lecture
Tracy Johnson
RNA Splicing, Chromatin Modification, and the Coordinated Control of Gene Expression

MARCH 16, 2022
Judith Frydman
Knowing Right From Wrong (Protein Conformation): The Challenging Choices of (Molecular) Chaperones

MARCH 22, 2022
Special Tuesday Lecture, Demystifying Medicine
Sangeeta Bhatia
Tiny Technologies and Medicine: From Hepatic Tissue Engineering to Cancer Nanotechnology

MARCH 30, 2022
G. Burroughs Mider lecture
Andy Singleton
Leveraging the Intramural Research Program to Effect Foundational Progress in Neurodegenerative Disease

APRIL 6, 2022
Anna Huttenlocher
Title TBD

APRIL 13, 2022
NIH Director's Lecture
Leslie Vosshall
Neurobiology of the World's Most Dangerous Animal

APRIL 20, 2022
Hans Clevers
Organoids to Model Human Disease

APRIL 27, 2022
Rebecca Heald
In Vitro Approaches to Investigate Cell Division and Biological Size Control

MAY 4, 2022
Rolla E. Dyer Lecture
Namandje Bumpus
Toward Personalizing HIV Treatment and Prevention

MAY 11, 2022
John Kuriyan
Title TBD

MAY 18, 2022
Robert S. Gordon Jr. Lecture
Speaker TBA
Title TBD

MAY 25, 2022
Marshall W. Nirenberg Lecture
Olufunmilayo I. Olopade
Genomic Basis of Breast Cancer Progression in Blacks

JUNE 1, 2022
NIH Director's Lecture
Damien Fair
Title TBD

SUMMER 2022

JUNE 8, 2022
Yishi Jin
Molecular Genetic Mechanisms in Neuronal Stress and Maintenance

JUNE 15, 2022
Gillian Griffiths
Identifying Novel Genes That Impact T Cell Effector Function

JUNE 22, 2022
Florence Mahoney Lecture on Aging
Yakeel T. Quiroz
Charting the Path for Alzheimer's Prevention: From Biomarkers to Therapeutic Targets

JUNE 29, 2022
Ileana Cristea
Dynamic Organelle Shape and Function During Herpesvirus Infection

National Institutes of Health
